As has always been the case, the program should display some type of description of its execution.

![Lab 1 Description](image1.png)

Figure 1: Lab 1 Description

The user is prompted for a `String` object that will represent the name of the seller of the property.

![Lab 1 Prompt for seller](image2.png)

Figure 2: Lab 1 Prompt for `seller`
The user is prompted for a `double` object that will represent the cost of the property.

![Figure 3: Lab 1 Prompt for price](image)

The program displays the seller’s home, the cost of the property, the cost to sell the home and the commission earned by the listing agent with all monetary values appropriately formatted.
