With a million dollars more in circulation than in Harlem, but 100,000 fewer people, it was a mystery as to why there was so much

## Tuesday, June 30

### Ida Lupino

Join **Francine J. Sanders, M.A.**, for a special tribute to this talented actress turned groundbreaking director. Ida Lupino (1918-1995) was a resourceful, bold, and beautiful actress who also left an indelible mark behind the camera. In her early career, Lupino played worldly, often tough characters. But in 1947, out of frustration over the lack of interesting roles for women, she left Warner Bros. and became a free agent—adding writing, producing and directing to her resume. Later she created her own production company, focusing on films with taboo subject matter. As director, producer, and actress, Lupino offered exciting alternatives to Hollywood studio fare.

### America's First Ladies: The Best, the Worst, and the Strangely Forgotten

America's presidential spouses have often wielded great political influence, and they have always been subject to intense public scrutiny. But what does it take to be a great first lady? The role comes with no job description, no pay, and no written requirements. In this illustrated lecture, historian **Leslie Goddard, Ph.D.**, explores which first ladies rank highest and lowest among historians and political scientists, who you think ranks best or worst, why some were vilified, and what the future might hold for this institution.

2020 marks the 100th anniversary of the 19th Amendment giving women the right to vote in all U.S. elections. Join historian **Jeanne Schultz Angel** to discuss how, since the Seneca Falls Convention of 1848, women promoted, persuaded, and often bravely fought for equal rights under U.S. law. The road to enfranchisement and equal rights has had many roadblocks and remains under construction through gerrymandering, voting access, and election tampering. Explore where we stand in 2020 and where we are going as we reflect on the history of universal suffrage.

Wells, and other suffragists experienced, and how African American women continue to struggle for inclusion today when it comes to documentation and commemorations of the movement.

This past fall, three state elections in the former East Germany yielded upsetting results, revealing an unfortunate rift in political philosophies between East and West Germans. Add to that a somewhat flagging economy, woes with the aftermath of Brexit, the ever-present threat of Trump tariffs, and—not to forget—a political class lacking direction and a clear vision to move the country forward. #### The Youth Vote and the Coming End of Polarization

Since 2004, young Americans have leaned Democrat in every national election, often by landslide margins. Now, a large bulge of millennial voters is making its way through the American demographic pyramid, already transforming the 30-44 demographic into a heavily Democratic one. How will this trend affect the future of American politics? **David Faris, Ph.D.**, discusses whether the U.S. is on the verge of a cyclical realignment, as older voters are replaced with ideologically progressive young people. Could this portend the end of a nearly 40-year period in which the two parties have captured stable and nearly equal shares of the national vote?
